

AllFusion Harvest 7.x End User Course

Preface

This 1-day end user course is designed to introduce AllFusion Harvest users with the skills they will need to perform day-to-day functions of Computer Associate's latest release of AllFusion Harvest product version 7.x. This course includes principles of Software Configuration Management (SCM) and the AllFusion Harvest functions and basic use of the AllFusion Harvest Workbench. The education program is a "hands-on" course where participants will complete a Lab exercise providing them with actual experience with AllFusion Harvest.

Anyone new to Computer Associate's AllFusion Harvest version 7.x will benefit from this course.

Philosophy

Polaris Technologies is an innovative software and consulting company that is committed to the successful implementation of Software Configuration Management (SCM) processes and tools in the corporate community. Working co-operatively with Computer Associates, Polaris is providing SCM solutions to a wide range of applications across multiple disciplines and industries.

Polaris is also a Computer Associates Consulting Partner that offers a full line of AllFusion Harvest training and consulting services.

Our diverse consultant base enriches our team with a variety of backgrounds and perspectives that broaden the scope of our solution development. This diversity aligned with our array of business partnerships offers you an unequalled set of resources to further boost your competitive advantage.

One of the greatest assets at Polaris is our commitment to assist you with effectively managing your business outcomes throughout the entire life cycle. From strategic analysis and planning, business process re-engineering, solution implementation and integration through to education, knowledge transfer and outsourced process management, our professionals have the expert knowledge and experience to engineer a solution targeted to your organization's particular needs and requirements.
