

AllFusion Harvest Gold Program

The toughest application development problem is managing the continuous software evolution to meet changing requirements. The AllFusion Harvest Gold Program provides IT departments with detailed AllFusion Harvest product knowledge and a general strategy to implement software configuration management (SCM) solutions. Polaris' professional configuration management consultants will train management, SCM, Testing, and QA team members, help develop a general Software Configuration Management strategy and assist in developing a site unique prototype SCM solutions in AllFusion Harvest. The AllFusion Harvest Gold Program will insure a successful beginning towards controlling software development and changing requirements challenges.

Program Elements

- AllFusion Harvest Introduction Training (maximum class size is 12)
 - Define Configuration Management and the common SCM problems
 - Review Harvest Concepts & the Harvest Workbench
 - Review Harvest Process Models and how they work together
 - Modify an existing Harvest Process Model
